

BUILD VS BUY

When you're considering setting up an affordable and effective security stack for your organization, there are typically two trains of thought. Build it yourself or have someone else do it. There are several considerations, especially for smaller businesses. Here's a summary of what to look out for when comparing a DIY and a modern MSSP approach like SolCyber.

Foundational Security Stack	Do It Yourself	SolCyber
Basic Security Assessment	\$10,000 Yearly	
Phishing Simulation	\$1 Monthly	
Phishing Training	\$2 Monthly	
EPP+EDR	\$8 Monthly	
Advanced Email Protection	\$2 Monthly	
Active Directory Protection & Lateral Movement Detection	\$15,000 Yearly	
SOCaaS	\$10 Monthly	
Vendors		
Vendor Management	0.10 FTE	0.02 FTE
Technology POC and Implementation	0.40 FTE	Included
Cost per FTE	\$70,000	NA
Vendors to manage	6	1
Cost Per User, Per Month based on 100 Employees		
Average cost per employee (Monthly) - Including 0.5 FTE	\$73*	\$57
Average cost per employee (Monthly) - Including 1 FTE	\$102.17*	\$57
<small>*Street price</small>		
Time to Outcome	18 months	30 days
