

Customer Case Study:

Fortifying Precision: A Rapid Cybersecurity Transformation

Size:
300 employees

Vertical:
Manufacturing

Location:
US

CHALLENGE:

When a global leader in precision movement components faced a cyber breach due to a successful phishing attempt, the incident served as a wakeup call, prompting them to reevaluate their cybersecurity posture. Recognizing the critical need for enhanced security measures, the company took proactive steps to address vulnerabilities after remediating the breach with SureFire, an Incident Response (IR) partner of SolCyber.

SOLUTION:

Turning to SolCyber for expertise, the company opted for SolCyber's MDR++ as the cornerstone of their revamped security strategy. MDR++ provided a comprehensive solution, incorporating an advanced Security Information and Event Management (SIEM) system and a 24/7 Security Operations Center (SOC) team, ensuring continuous protection. This strategic decision spared the company from the complex and costly process of hiring dedicated security personnel or evaluating multiple vendors. Remarkably, SolCyber executed the entire implementation process, from onboarding to full operation, in 30 days.

OUTCOME:

With MDR++ seamlessly integrated into their security framework, company leadership now rests assured, knowing their digital assets are under constant protection. The expeditious implementation allowed them to swiftly overcome the breach's aftermath, redirecting their focus towards robust business growth. As the company continues its trajectory, the scalable nature of SolCyber's solution ensures ongoing alignment with their evolving business expansion plans.
